

## Farnborough Testing Centre

Qdos Event Hire was contracted by East Berkshire Primary Care to project manage the install of its temporary building requirements at its Covid-19 Testing Centre at Farnborough International Exhibition & Conference Centre. All work was carried out adhering to strict Covid-safe protocols with robust risk assessments and method statements produced that took account of social distancing, increased sanitation and the wearing of masks and visors wherever practicable.

To create the three required testing lanes, Qdos supplied three of its 24' x 9' cabins with a 50/50 split partition to ensure there was no cross contamination. All tests that were carried out were taken to their own dedicated space. Qdos facilitated and co-ordinated the install of three 10m x 10m marquees from third party supplier Pridewatch. In addition, Qdos installed a 32' x 10' hospitality suite that was used as a welfare space by the testing staff members and allowed for safe social distancing.

Qdos' and Pridewatch's cabins and marquees were onsite for a 13-week period which began in April 2020 at the height of pandemic.
