

Chinnor Rugby Club Try Line Suite & Terrace

Qdos Event Hire has designed and built a bespoke Try Line Suite and Terrace for Chinnor Rugby Club utilising units from its QVue range. The club is currently second in National League 1 and in a strong position to challenge for promotion to the Championship.

The club came to us as it was looking to make improvements to its infrastructure, with a view to supporting its on-field ambitions, improve the supporter experience and generate additional revenue streams.

Positioned pitch side, the Try Line Suite and Terrace features floor to ceiling glass panels, a 5-metre-high viewing terrace created with CTX balconies and a separate bar area. The interior is finished to a high standard with a vinyl floor, heating, air conditioning and PIR sensor LED lighting. Access to the terrace area is via two staircases conveniently located at either end of the suite.

It has the capacity to accommodate 20-40 guests on match days and has proved a huge hit with club supporters.

“This summer we embarked on a series of improvements to the facilities that benefits all facets of the club. The new Qdos Try line Suite and Terrace has made a significant impression, improving the match day experience with an enclosed space for entertaining and the impressive terrace for a heightened view of the action on the pitch. This welcome addition also presents us with a new commercial opportunity, for sponsors and/or corporate guests or private events. We’ve embarked on many projects over the years but none have had such an immediate positive impact.”

Nick Stainton, Chinnor RFC, Chairman
